

Now there are two Mamiya 23 Press cameras

MAMIYA 23 DELUXE

*combines hand-camera
compactness with the
versatility of back swings*

MAMIYA 23 STANDARD

*provides same
fast-handling features where
back-swings are not needed*

Both use rf-coupled, interchangeable lenses—accept 120 rollfilm, sheet film or pack

Solid, compact, easily maneuverable, these Mamiya 2¼ x 3¼ cameras are made to order for hand-held shooting. Both are supplied with sturdy, trigger-action hand grips, and both have combined range-viewfinders with parallax correction to 3½ feet.

Both also accept interchangeable, range-finder-coupled lenses which can be switched in a matter of moments. No bellows are used. Lenses are supported in tubular mounts with helical threads and oversized, knurled focusing rings. And you're not limited to film type, either. You can use rollfilm, sheet film, packs and even glass plates, as you choose.

In addition the Mamiya 23 Deluxe is equipped with back-swings for perspective control in architectural photography, and for depth-of-field control in still-life close-ups. The Mamiya 23 Standard differs from the Deluxe in that it has no back swings.

MAMIYA 23 DELUXE Cat. No. 60051 Supplied with 90mm f3.5 lens, lens hood, trigger-grip and cable release, and groundglass focusing panel.

MAMIYA 23 DELUXE Cat. No. 60052 Same as No. 60051, but equipped with Graflok® back.

MAMIYA 23 STANDARD Cat. No. 60055 Supplied with 90mm f3.5 lens, lens hood, trigger-grip and cable release, and Model A (6x9 cm) rollfilm holder.

MAMIYA 23 STANDARD Cat. No. 60056 Same as No. 60055, but with Model B (6x7 cm) rollfilm holder. ©Reg. TM Graflex, Inc.

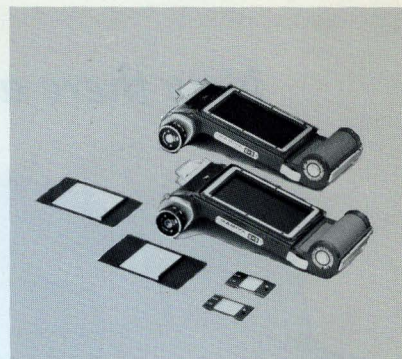

ACCESSORIES FOR MAMIYA 23 PRESS CAMERAS

INTERCHANGEABLE LENSES Each couples to camera rangefinder and each is equipped with helical focusing system, and mounted in M-X synchro shutter, speeds, 1 second to 1/500th plus 'B' 65mm f6.3 wide angle. Cat. No. 60100 Supplied with optical finder attachment. 90mm f3.5 standard. Cat. No. 60101 Supplied with lens hood. Uses normal camera finder 150mm f5.6 telephoto. Cat. No. 60102 Supplied with lens hood. Uses slideout mask on camera finder

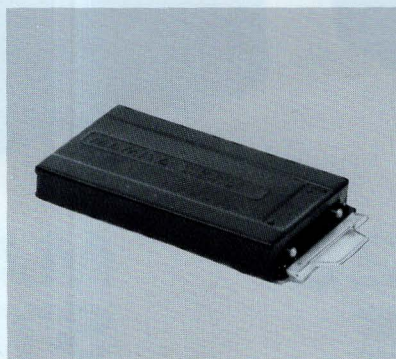

GROUNDGLASS PANEL Cat. No. 00000 Attaches to camera equipped with Mamiya back. Used for viewing and focusing through the lens. Necessary when camera is to be used with sheet film/plate holders or film pack adapter. Groundglass screen is recessed and shielded from overhead light by flip-open cover Quickly detachable when rollfilm holder is to be used. Supplied as standard equipment with Mamiya 23 Deluxe (Cat. No. 60051) available as accessory for Mamiya 23 Standard (Cat. Nos. 60055 and 60056)

120 ROLLFILM HOLDERS Model A (6 x 9 cm) Cat. No. 60605 Takes (8) 2 1/4 x 3 1/4 exposures. Model B (6x7 cm) Cat. No. 60606 Takes (10) 2 1/4 x 2 3/4 exposures. Each also takes (12) 2 1/4 x 2 1/4 and (16) 1 5/8 x 2 1/4 shots, and is supplied with viewfinder masks for these sizes. Each attaches directly to camera equipped with Mamiya back, in place of groundglass panel housing.

SHEET FILM/PLATE HOLDERS Cat. No. 60610 For single exposures, using 2 1/4 x 3 1/4 sheet film or plates. Permit unlimited choice of emulsions. Fit into side opening of groundglass panel housing.

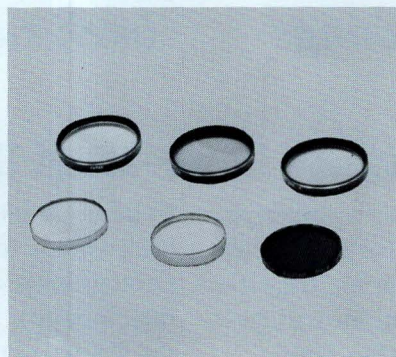

FILM PACK ADAPTER Cat. No. 60611 Accepts standard 520 film packs with (12) 2 1/4 x 3 1/4 exposures. Dark slide permits removal of adapter at any time. Fits into groundglass panel housing.

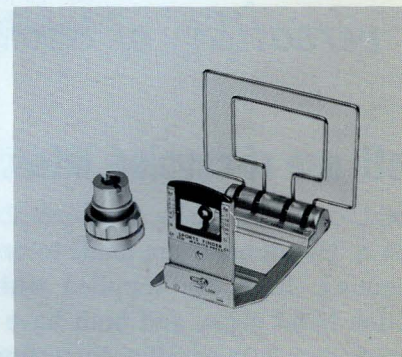

EXTENSION RING SET Cat. No. 60650 Consists of 4 lens extension rings, used separately or in any combination for close-up work.

CARRY-ALL BAG Cat. No. 60450 Luxurious top-grain leather, with adjustable shoulder strap. Partitioned to hold camera, extra lenses and accessories.
