THE CONTAREX CAMERA

Contarex A-1

CROSS SECTION OF CONTAREX

- | | |
|------------------------------|---|
| 1. Planar f/2, 50mm lens. | 8. Fresnel lens with ground glass ring and split-image rangefinder. |
| 2. Lens diaphragm. | 9. Reflecting mirror. |
| 3. Lens diaphragm coupling. | 10. Focal plane shutter. |
| 4. Exposure meter diaphragm. | 11. Film. |
| 5. Photoelectric cell. | 12. Protective capping plate. |
| 6. Accessory shoe. | |
| 7. Penta Prism. | |

The Contarex is the top-ranking Zeiss Ikon camera, a camera of distinction in performance as well as in appearance. It combines the features of two leading designs: the famous Contax with completely interchangeable lens mount and the unique Contaflex single-lens reflex camera. Needless to say, such a combination of two outstanding camera designs sets new standards in versatility, precision and convenience, and it lends prestige to its owner.

The Contarex camera is designed for the most rugged conditions, made of carefully selected materials and finished to utmost perfection. It is a piece of equipment you will admire for its workmanship and dependability. Its versatility makes it the ideal tool for the advanced and discriminating photographer. With a complete set of lenses, you cover anything from 90 degree wide-angle pictures to amazing telephoto shots. Photomicrography, macro photography and copy work can be done with a few inexpensive accessories. There are indeed numerous applications for the Contarex in medical, industrial, news, studio and sports photography.

The unique single-lens reflex principle

With a single-lens reflex camera you sight and focus through the camera lens, and it does not matter if it is a standard, wide-angle or telephoto

Contarex with major lenses and accessories

lens. In addition, you can fit a supplementary close-up lens or any other attachments over the lens, and the viewfinder image will still be parallax corrected. You also retain the convenience of the built-in rangefinder, the most important advantage of the single-lens reflex camera over regular 35mm cameras. In the Contarex, this single-lens reflex principle has been brought to unsurpassed perfection.

THE CAMERA BODY

A strong, die-cast body, from a light metal alloy, makes Contarex impervious to all kinds of climatic conditions. Outside metal parts are black anodized or satin chrome finished for greater durability. The camera body is handsomely covered with fine morocco leather. For fast loading and easy cleaning, the camera back is completely removable. The Contarex without lens weighs 32 ounces and measures $2\frac{1}{2} \times 4 \times 6$ ", a truly compact, well proportioned and perfectly balanced camera.

VIEWFINDER AND RANGEFINDER

A large parallax-corrected eye-level viewfinder provides an extra bright natural-size image, always sharp to the edges for instantaneous compositions. You see and focus through the lens, wide open. It also features an instant-return mirror which returns to viewing position after each exposure. The Penta roof-type prism makes the subject appear upright and unreversed, which is an essential point in sports photography and various other fields. The Fresnel lens guarantees an amazing overall brightness which is a necessity for available light photography. Simultaneously with viewing the subject, you focus the lens on either the split-image field or the surrounding extra fine focusing screen. This combined view and rangefinder is ideal for full-frame compositions of action shots. At the same time, you have complete control over the built-in exposure meter as the indicating needle is placed adjacent to the viewfinder image.

EXPOSURE METER

Zeiss Ikon exposure meters have proved to be most reliable for over 25 years, and the Contarex meter is, indeed, outstanding in performance as well as in its special features. Built into the camera for protection and for greater convenience, this exposure meter couples to all interchangeable lenses with automatic preset diaphragms (35mm to 135mm). The ingenious interlock system gives the choice of pre-selecting either a shutter speed or a lens opening, and the other setting is then adjusted with the exposure meter. Most other single-lens reflex cameras do not provide this alternative, and with these designs, the shutter speed must be pre-selected at all times. The Contarex exposure meter also permits conventional shutter speed and f/stop settings for non-preset lenses (21mm and 250mm). Furthermore, the automatic interlock can be temporarily disengaged to use individual settings for deliberate under or over-exposures (green dot setting). There are provisions for reflected and incident light readings.

To increase the sensitivity of this exposure meter under poor lighting conditions, simply remove the light baffle in front of the photocell, and the exposure meter will be 16x more sensitive than under ordinary conditions. This is equivalent to four full lens stops (yellow dot setting). The exposure meter can be adjusted at waist level or eye level. The indicating needle is adjacent to the viewfinder image. The 35mm, 50mm and 55mm lenses automatically compensate for the natural loss of light at near distances.

THE FOCAL PLANE SHUTTER

There are 12 shutter speed settings on a single dial, including B, 1-1/1000 sec., and each speed operates with amazing smoothness. The built-in self-timer can be adjusted to various time delays, and the shutter is fully synchronized for flash bulbs and electronic flash units. Each speed is color coded and you adjust the synchronization automatically as you select a particular shutter speed.

COLOR CODE FOR FLASH SYNCHRONIZATION

Black speeds (X—contact) 1—1/30 sec: Class M bulbs, electronic flash units

Yellow speed (X—contact) 1/60 sec: Electronic flash units only

Red speeds (M—contact) 1/125—1/1000 sec: Focal plane (FP) flash bulbs

All speeds from 1—1/1000 sec. operate with the built-in self-timer for flash exposures.

RAPID FILM ADVANCE LEVER

One stroke with this lever advances film, cocks shutter, then opens lens diaphragm for viewing.

RAPID REWIND CRANK

A collapsible crank permits fast rewinding of 20 or 36 exposure loads into the cartridge.

Contarex Special

Contarex Special camera and interchangeable viewfinder components

Although the Contarex is widely considered the most versatile 35mm camera on the market, there are certain groups of photographers, serving the professional and scientific fields, who are interested in, and require other, technical features. Their suggestions have prompted the factory to design another Contarex model which was named "Contarex Special." This model meets the special requirements of these photographers as well as amateur photographers who find its features more appealing than the regular model. There is, however, no difference between Contarex and Contarex Special regarding workmanship, material, precision and dependability.

THE CAMERA BODY

The bodies of both the Contarex and Contarex Special are similar in basic design. The Contarex Special with f/2.8 Tessar lens weighs approximately 40 ounces.

VIEWFINDER AND RANGEFINDER

The Contarex Special features a convertible viewfinder arrangement which permits the photographer to switch from eye-level viewing with penta prism attachment to waist-level viewing with collapsible focusing hood in seconds. He also has the choice of using a full ground-glass screen or a split-image rangefinder with circular focusing screen. Both eye-level and waist-level viewfinders have their merits, and the use of one or the other largely depends on the subject matter to be photographed and individual techniques in focusing and composing the picture. In photomicrography and copy work, the full ground-glass with waist-level viewfinder has proved to be more practical than the split-image rangefinder as it better reveals the minute structure of the specimen when focusing. Both viewfinder systems are parallax-corrected and provide a very bright image. Most photographers will discover that they need both systems to be fully equipped to handle all areas of complex technical and scientific photography.

EXPOSURE METER

The Contarex Special is not equipped with a built-in exposure meter. We recommend the Zeiss Ikon Ikophot Rapid exposure meter for use with this camera.

PHOTOMICROGRAPHY

A few inexpensive adapters connect the Contarex without lens to standard microscopes with 25mm diameter eye-piece sleeve. The built-in viewfinder is parallax corrected for this purpose and the circular focusing screen indicates when the microscope is adjusted for maximum definition. As an additional accessory, we suggest the right-angle viewfinder.

TABLE REPRODUCTION STAND

The table reproduction stand clamps to tables or drawing boards for all kinds of copy work and table-top photography. The camera can be aligned vertically and horizontally or at any intermediate position. The 24-inch pillar permits copy work of 10 x 15" documents or any smaller sizes. When copying material is larger than 10 x 15", swing the camera out and place the documents on an adjoining lower table or directly on the floor.

FOCUSING BELLOWS ATTACHMENT

If the interchangeable Contarex lenses do not provide sufficient magnification at near distances, the focusing bellows attachment is recommended with its long bellows extension. This Contarex attachment covers minute objects in one sweep, and it is extremely flexible for medical and dental close-ups. The attachment can be used in conjunction with 35, 50, 55, 85 and 135mm lenses. (Specifications see page A-11.)

FILTERS

Filters and lens hoods are supplied in bayonet mounts for quick and convenient interchangeability. One size filter for all lenses from 21mm to 135mm focal length.

INTERCHANGEABLE MAGAZINE BACK

This back is loaded with standard 35mm film cartridges containing 20 or 36 exposure loads. It permits rapid interchange of films at any time. There is no loss of film involved because each interchangeable back has its own dark slide.

Loading with two cassettes

Offers considerable advantages. It eliminates the necessity of rewinding exposed film, and partly exposed film can easily be removed in broad daylight. This facilitates exchange of one type of film for another, of black-and-white film for color, whenever such quick change is desired.

Contarex Lenses

FOR CONTAREX AND CONTAREX SPECIAL

The Contarex is equipped with some of the finest lenses as far as workmanship, material and performance are concerned and the fact that they are genuine Carl Zeiss lenses is your guarantee of complete satisfaction. The factory cuts and grinds these lenses from carefully selected glasses which are products of constant research in the optical field. All air-to-glass surfaces are hard coated (anti-reflection coating) for increased light transmission and greater image contrast. The lenses are carefully matched for color rendition. Precision mounts ensure perfect fitting; distance scales are calibrated in feet.

Lens Carrying Case #20.7842 for three Contarex lenses and accessories.

The built-in fully automatic pre-set diaphragm of 35 to 135mm lenses couples automatically to the exposure controls of the camera as soon as such a lens is fitted to the Contarex. The necessary connecting parts cannot interfere with the operation of the camera because they are placed inside the lens mount. The 21mm Biogon and 250mm Sonnar feature conventional, hand-operated diaphragms without interlock; the 250mm Sonnar can be pre-set manually.

LENS SPECIFICATIONS

	Angle of view	Elements	Smallest aperture	Closest distance	Approximate min. coverage
Biogon f/4.5, 21mm (13/16")	90°	8	f/22	3 ft.	3' 1" x 4' 8"
Distagon f/4, 35mm (1 3/8")	63°	7	f/22	8"	2 3/4" x 4"
Planar f/2, 50mm (2")	45°	6	f/22	12"	3 3/8" x 5 1/4"
Tessar f/2.8, 50mm (2")	45°	4	f/22	15"	4 1/2" x 6 3/4"
Planar f/1.4, 55mm (2 1/8")	41°	7	f/16	18"	5 1/4" x 8"
Sonnar f/2, 85mm (3 3/8")	28°	7	f/22	30"	7" x 10 1/2"
Sonnar f/4, 135mm (5 3/8")	18°	4	f/22	4'	7" x 10 1/2"
Sonnar f/4, 250mm (10")	10°	4	f/22	8'	8" x 11"

BIOGON f/4.5, 21mm

The 21mm Biogon, first 90 degree wide-angle lens in the 35mm field, is a completely new design based on a unique formula. It offers excellent definition over the entire negative area at full aperture (f/4.5), is free of distortion and provides outstanding illumination near the edges, which is a major problem with any wide-angle design. The tremendous depth-of-field (3' 6" to Infinity at f/4.5) makes it an excellent fixed-focus lens for instantaneous snapshots. It is also indispensable when photographing a large area at a comparatively short distance, for instance, charts, machines or testing equipment in small spaces. For the same reason photographers prefer the Biogon for architectural subjects and general indoor photography.

DISTAGON f/4, 35mm

The Distagon is a universal wide-angle lens with crisp definition and excellent illumination over the entire field. It has an extremely long back focus to provide sufficient clearance for the mirror of single-lens reflex cameras. The Distagon is widely used in indoor photography and for scenic pictures whenever the 50mm standard lens does not give sufficient coverage. This lens focuses as close as 8", which is another interesting feature of its design.

PLANAR f/2, 50mm

The Planar lens is based on a Carl Zeiss formula which dates back as far as the beginning of the century, and since that time it has undergone innumerable optical and mechanical improvements. Consequently the current f/2, 50mm Planar lens for the Contarex represents the ultimate in modern lens design.

Among other outstanding characteristics, the lens produces an exceptionally flat image with uniform and needle-sharp resolution over the entire field. The excellent correction of spherical and chromatic aberration and its proper rendering of contrasts, makes it a truly ideal standard lens for color and black-and-white photography. It focuses as close as 12" in its standard Contarex mount.

TESSAR f/2.8, 50mm

The Carl Zeiss Tessar, widely known the world over for more than 50 years, was included in the line of available Contarex lenses for several good reasons. Its needle-sharp definition and complete absence of distortion, for example, make it the ideal lens for architectural subjects, copy work of line patterns, and similar applications. Most photographers feel that the f/2.8 maximum opening provides sufficient speed with modern high-speed films. This lens is particularly recommended for the Contarex Special.

PLANAR f/1.4, 55mm

This Planar f/1.4, 55mm represents a completely new lens design, in which quality and sharpness of image have not been sacrificed in the interest of speed. It has an angle of field of 41° , placing it in the category of standard lenses for the Contarex for universal application. In comparing it with the Planar f/2, 50mm lenses, it can be said that in spite of doubling the speed, the image quality remains excellent at f/1.4 as well as all other apertures. This unusual performance is remarkable in view of the fact that single-lens reflex cameras require a special lens design of great back focal length to offer sufficient clearance for the mirror.

SONNAR f/2, 85mm

This Sonnar combines a medium telephoto effect with high lens speed and it is preferably used in sports, stage and press photography. Professionals also prefer this lens for taking portraits as it yields a large image from a distance, thus reducing the perspective distortion inevitable with shorter-focus lenses. From an optical point of view, high lens speed, good definition and outstanding illumination are the chief characteristics of this design. The comparatively short over-all length of the lens makes it very convenient in indoor and outdoor use.

SONNAR f/4, 135mm

Whenever the 85mm Sonnar lens does not provide sufficient magnification, this telephoto lens may solve your photographic problems. With 2.7X magnification as compared to the 50mm standard lens, it is very popular with sports photographers who wish to cover certain phases of the game from a distance. It is also needed in wildlife photography and for other types of distant shots. From an optical point of view this four-element lens is of truly outstanding correction. The critical aperture is f/4.5 (almost wide open) and smaller lens openings will not increase the definition of the lens but will only give a more extended depth-of-field. The 135mm Sonnar is also a short-barrel lens, a special feature of the Sonnar type.

SONNAR f/4, 250mm

This Sonnar belongs in the class of long telephoto lenses and produces extremely brilliant pictures with amazing detail. It is designed for those Contarex owners who need more than average magnification combined with unsurpassed definition. Its 5X magnification over the standard lens also lends a most interesting perspective to distant subjects. The outstanding features of the famous Sonnar such as brilliancy, excellent definition and even illumination are retained in this tele Sonnar lens.

20.1017-85	85 for Kodacolor, Kodachrome and Anscochrome Tungsten-type films		
	All Zeiss Ikon filters are dyed-in-the-mass, solid optical glass, plane-parallel finished to the highest degree. Mounted in chromium plated mounts. Color film conversion filters are domestically manufactured to our specifications.		
20.1206	CONTAPOL, polarizing filter in bayonet mount, 56mm.....	(1) 6516-00/(3) 9014-40	24.00
	The Contapol subdues reflections on glass, water, and other non-metallic surfaces, darkens blue skies in color photography without changing subject colors. The filter factor is approx. 3X.		

ACCESSORIES FOR CLOSE-UP PHOTOGRAPHY

20.0840	PROXAR CLOSE-UP LENS, bayonet mount, 56mm, 5x, f = 0.2m (for distances 4-8 in.).....	(1) 298-33/(3) 887-50	12.50
	Approx. minimum coverage: $1\frac{3}{4} \times 2\frac{1}{2}$ " } with 50mm lens		
	Approx. maximum coverage: $3\frac{3}{8} \times 5\frac{1}{4}$ " }		
20.1617	BELLOWS EXTENSION (double track) for 35 to 135mm lenses.....	(1) 1458-67	88.00
	Approx. permissible field sizes with:		
	35mm lens: $\frac{1}{4} \times \frac{3}{8}$ " to $1 \times 1\frac{1}{2}$ "		
	50mm lens: $\frac{3}{8} \times \frac{3}{8}$ " to $1\frac{1}{8} \times 2\frac{3}{8}$ "		
	85mm lens: $\frac{9}{8} \times 1$ " to $2\frac{7}{8} \times 3\frac{3}{4}$ "		
	135mm lens: $1 \times 1\frac{1}{2}$ " to $3\frac{1}{2} \times 5\frac{1}{4}$ "		
	TABLE REPRODUCTION STAND consisting of:		
20.1826	Table Clamp	(1) 327-67/(3) 886-90	11.50
20.1819	Pillar 2' long	(1) 947-67/(3) 196-90	11.50
20.1828	Connecting Arm	(1) 458-33/(3) 927-50	12.50
20.1824	Camera Adapter	(1) 578-33/(3) 727-50	12.50
	LIGHTING UNIT FOR TABLE REPRODUCTION STAND:		
20.1810	1 T-Clamp.....	(1) 346-67/(3) 476-00	10.00
20.1820	1 Transverse Tube.....	(1) 105-67/(3) 665-10	8.50
20.1811	2 Clamps.....	(1) 995-00/(3) 744-50	each 7.50
20.1808	2 Tubes for carrying Reflector.....	(1) 802-00/(3) 201-80	each 3.00
20.1812	4 Clamps.....	(1) 765-00/(3) 414-50	each 7.50
20.1813	4 Reflectors with articulated tubes and U.S. adapter.....	(1) 2110-00/(3) 709-00	each 15.00

Contarex and Contarex Special Accessories for Close-up Photography, Cont.

20.1634	RIGHT-ANGLE VIEWFINDER for viewing and focusing at waist-level and for copy work, photomicrography. Mirror reflex viewfinder with adjustable eyepiece which is fitted to the eyepiece of the camera (cannot be used with Contarex Special and waist-level viewfinder).....	(1) 5614-00	21.00
20.1628	MICRO ATTACHMENT for 25mm Eyepiece Sleeve, consisting of: 1 Contarex Adapter	(1) 306-33	9.50
20.1616	1 Connecting Ring	(1) 818-33/(3) 377-50	12.50

SUNDRY ACCESSORIES FOR CONTAREX AND CONTAREX SPECIAL

20.0304	INTERCHANGEABLE MAGAZINE BACK (available December 1961)	(1) 1736-67/(3) 2833-00	55.00
20.7856	LEATHER CASE for interchangeable magazine back.....	(1) 135-00/(3) 214-50	7.50
20.0281	CABLE RELEASE, locking, 10-in. long, with special locking device for long time exposure.....	(1) 411-07/(3) 530-96/(12) 170-91	1.60
20.0001	TAKE-UP SPOOL, made of plastic, with tooth for anchoring film.....	(1) 950-33/(3) 460-30/(12) 220-28	.50
20.0211	NECK STRAP, black leather, adjustable to a length of 29-in. Equipped with locking device.....	(1) 631-30/(3) 281-17	1.95
20.0504	EYE-CORRECTION LENS (spherical only) from ± 1 to ± 5 diopters in steps of 0.5 diopters each, for Contarex and Contarex Special with penta prism viewfinder attachment, special order only together with prescription for eye used.....	(1) 502-00/	3.00
20.0300	CASSETTE, complete	(1) 145-00/(3) 894-50	7.50
20.0301	CORE, Cassette	(1) 700-33/(3) 210-30	.50
	For using "Bulk" film. By using a cassette at each end, films may be interchanged with a minimum loss and film need not be re-wound before unloading. This cassette is also used in the Contax and Contaflex cameras. Complete cassette furnished in container and with core (spool). Core supplied separately for replacement; it is not identical with take-up spool.		
20.2214	IKOBLITZ 4, BC flash unit for bayonet base flash bulbs #5, with folding reflector, removable adapter for M5 and M25 bulbs. For 15-volt BC battery (battery not included).....	(1) 546-63/(3) 315-97/(12) 734-98	9.95

The Contarex System Case, filled

CONTAX

IIa and IIIa

1932 Model

CONTAX I—first 35mm. camera with built-in coupled range-finder.

1936 Model
CONTAX II—successor to the Model I—so successful the world over.

1936 Model
CONTAX III—like CONTAX II, but with built-in photo-electric exposure meter.

1950-1961 Models
CONTAX IIa and IIIa cameras reflect the optical and mechanical refinement of nearly a century of manufacturing skill.

CONTAX cameras are now discontinued but, for the benefit of owners, we are still offering a limited stock in lenses and accessories subject to prior sale. Do not delay ordering necessary lenses and accessories.

VIEW-FINDERS

20.1502	UNIVERSAL turret type view-finder for 21, 35, 50, 85, 135mm. lenses, in leather case.....	(1) 8870-00/(3) 2063-00	105.00
	The Universal View-Finder is of the revolving (turret) type, and slides into the accessory shoe of the Contax. It is adjustable for parallax compensation and shows the fields covered accurately and sharp to the edges. The field remains the same regardless of the focal length lens used. Built-in eye correction.		
20.1503	UNIVERSAL view-finder with luminous frames for 35, 50, 85, 135mm. lenses and stereo field, parallax adjustment, eyepiece threaded for eye-correction lens #20.0502, in leather case.....	(1) 4916-67/(3) 1815-00	25.00
	Parallax correction ranges: . = 3 to 6 ft., : = 6 to 13 ft., oo = 13 ft. to Infinity.		
20.1500	WIDE-ANGLE view-finder for Biogon 21mm. lens.....	(1) 8518-00/(3) 5516-20	27.00

LENS SHADES AND CASES

20.0706	Screw-on mount, 40.5mm., for Sonnar and Tessar 50mm. lenses.....	(1) 271-30/(3) 501-17	1.95
20.0711	Slip-on mount, 42mm., for Sonnar and Tessar 50mm. lenses.....	(1) 361-30/(3) 971-17	1.95
20.0707	Screw-on mount, 49mm., for Sonnar 85mm. lens.....	(1) 671-30/(3) 201-17	1.95
20.0705	Screw-on mount, 40.5mm., for Sonnar 135mm. and Triotar 85mm. lenses	(1) 161-30/(3) 481-17	1.95
20.7820	Leather case for any of the above lens shades.....	(1) 941-67/(3) 341-50	2.50

The lens shades for Contax are made of a light-weight alloy material, precision turned to assure secure, accurate fit over lenses. The leather cases can be secured to the shoulder strap of the camera Eveready case for convenience.

FILTERS

Screw-in mount, 40.5mm., for 21, 35, 50, 135 and Triotar 85mm. lenses and focusing head:

20.1006-UV	Ultra Violet 1x		(1) 745-00	each 7.50
20.1006-G	Yellow 2x		(3) 584-50	
20.1006-GR	Yellow Green 2x	Zeiss Ikon manufacture.....	(12) 324-25	
20.1006-O	Orange 5x			
20.1006-R	Red 8x			
20.1006-1A	1A Skylight for Kodachrome, Kodacolor, Anscochrome, Ektachrome, Super Anscochrome, High Speed Ektachrome, all daylight	Domestic manufacture		
20.1006-85C	85C for Kodachrome & Ektachrome, Type F			
20.1006-85B	85B for Super Anscochrome-Tungsten and High Speed Ektachrome, Type B			
20.1006-85	85 for Kodachrome, Anscochrome Tungsten-type films and Kodacolor			
Screw-in mount, 49mm., for Sonnar 85mm. lens:				
20.1007-UV	Ultra Violet 1x		(1) 777-33	each 11.00
20.1007-G	Yellow 2x		(3) 686-60	
20.1007-GR	Yellow Green 2x	Zeiss Ikon manufacture.....	(12) 586-23	
20.1007-O	Orange 5x			
20.1007-R	Red 8x			

All Zeiss Ikon filters are dyed-in-the-mass, solid optical glass, plane-parallel finished to the highest degree. Mounted in metal screw-in or slip-on mounts and furnished in clear plastic boxes. Color film conversion filters are domestically manufactured to our specifications.

20.1204	POLARIZING FILTER, BERNOTAR, for lenses 42mm. outside diam.	(1) 7211-67/(3) 5810-50	17.50
20.1205	POLARIZING FILTER, BERNOTAR, for lenses 51mm. outside diam.	(1) 4514-67/(3) 6513-20	22.00

The Bernotars subdue reflections in glass, water and other non-metallic surfaces, darken blue skies in color photography, but have no influence upon color correction in natural color photography. The filter factor is approx. 3x.

CONTAFLIX

Super and Prima 35mm

Contaflex Super

Contaflex Prima

The Contaflex cameras are 35mm single lens reflex cameras of sturdy construction and unique design. The camera body is die-cast from a light metal alloy and covered with black morocco leather. Other outside metal parts are either black anodized or satin chrome finished for greater durability. The camera measures $5 \times 3\frac{1}{2} \times 2\frac{3}{4}$ " and weighs 26 to 30 ozs. depending on the model. These proportions give the Contaflex an extremely compact design. The optical elements are manufactured and installed with utmost precision and the Contaflex has proven to be extremely dependable in all parts of the world, and under all kinds of climatic conditions.

SPECIAL FEATURES

1. Widest range of interchangeable lenses from 1:1 scale of reproduction over 35, 50, 85, 115mm up to 400mm focal length in Tessars, Pro-Tessars and Monocular 8x30B.
2. Built-in between-the-lens shutter with full flash synchronization (MXV). Shutter blades are permanently protected by rear elements. Shutter blades and iris diaphragm are also in the ideal position for perfect and accurate optical results.
3. Extra bright eye-level viewfinder with upright and unreversed image.
4. Penta Roof Prism incorporates both split-image rangefinder and extra fine focusing screening; automatic pre-set lens diaphragm and automatic frame counter.
5. Lenses factory coated (anti-reflection coating).
6. The Contaflex uses standard 35mm cartridges with 20 or 36 exposure loads. There are also Contaflex cassettes for bulk-film loading and we will soon supply interchangeable magazine backs for quick interchange of films without loss of frames. Negative size: $1 \times 1\frac{1}{2}$ " (24x36mm).
7. Current models feature built-in photo-electric exposure meters complying with ASA specification and coupled to the diaphragm.
8. All current models are equipped with rapid-wind lever for quick sequence shots.

Pro-Tessar f/4 35mm

Pro-Tessar f/4 85mm

Pro-Tessar f/4 115mm

Pro-Tessar M 1:1

Proxar close-up lenses, slip-on mount, 28.5mm in plastic case (#20.7070)

CONTESSA-MATIC E 35mm

Compact, automatic 35mm camera with conventional shutter speeds and "f" stops, interlocked with built-in exposure meter. Equipped with Carl Zeiss Tessar f/2.8, 50mm lens in Prontor SLK special shutter (MXV), built-in rangefinder. Exposure meter manually adjustable at waist and eye level.

TENAX AUTOMATIC 35mm

Fully automatic 35mm camera with Carl Zeiss Tessar f/2.8, 50mm lens in Prontomat-S shutter (1/30th to 1/500th second). Built-in exposure meter, automatically selects appropriate shutter speed and "f" stop. Lens settings identified by symbols: Portrait, Group, Landscape. Built-in "X" type synchronization at 1/30 of a second for flash bulbs and electronic flash units.

SYMBOLICA 35mm

Automatic 35mm camera with Carl Zeiss f/2.8, 50mm lens in Prontomat shutter. Exposure meter interlocked with shutter, manually adjustable. Same lens symbols and same type of flash synchronization as Tenax.

IKOMAT AUTOMATIC 2 x 2 in. SLIDE PROJECTOR WITH REMOTE CONTROL

The Ikomat is a completely automatic projector for regular 35mm. color slides and "super slides." Its streamlined appearance, smart two-tone finish and traditional Zeiss Ikon workmanship make it the ideal projection equipment for the quality-minded photographer. With a 12-foot remote control cord, he runs the complete slide show while sitting with the audience. At the touch of three buttons, he feeds the slides through the projector — forwards or backwards — and simultaneously adjusts the focus of the lens. Other features are:

- 1) Smooth and virtually silent operation.
- 2) Protection of treasured slides against damage.
- 3) Slides are pre-conditioned to prevent "popping."
- 4) Perfect ventilation to keep projector cool.
- 5) Extra bright, sharp image with Zeiss Ikon Diatar f/2.5, 100mm. lens and built-in aspheric condenser system.

The IKOMAT can be used with the Diatakt tape recorder synchronizer, which synchronizes the commentary or music with the automatic change of slides at pre-selected intervals.

The Ikomat Automatic Slide Projector

OVERALL DIMENSIONS: 11½" x 8¼" x 7½"

WEIGHT: 15 lbs.

Catalog number	LAMPS: 120-volt, 500-watt lamp (DAK) or 120-volt, 300-watt lamp (CWD).	PRICE

THE ZEISS IKON IKOSCOPE TABLE SLIDE VIEWER

The Ikoscopy Table Slide Viewer

This modern, two-tone plastic table viewer accepts up to 25 cardboard-mounted slides at a loading. A single stroke of the lever, which collapses flush with the casing when not in use, shifts each slide under the brilliant viewing lens and simultaneously drops the previous slide into a receptacle which, when not in use, swings flush with the casing to protect the viewing lens from dust and damage.

The Ikoscopy Table Viewer operates on 110-volt A. C. current and uses a candelabra-based 15-watt lamp. Vents assure ventilation and protect slides from over-heating.

The Ikoscopy measures 3 x 5 x 6 inches over all and weighs 14 ounces.

A Film Strip Holder is available as an accessory.

MONOCULAR							
8	x	30	3.75	15.5	8° 30'	150	7
8	x	30B	3.75	15.5	6° 18'	110	7
15	x	60	4.0	30.0	4° 30'	80	21

The smaller over-all dimensions of the new CARL ZEISS binocular came about through the introduction of an objective with air-spaces. Marginal sharpness is considerably improved by the use of oculars with six elements.

DISCOUNTS:

Our discounts on established consumer retail prices (including Excise Tax, where applicable) are, until further notice, as follows:

Group 1:	CONTAREX CAMERAS with Eveready Cases and Contarex Lenses:	
	on 1 or 2.....	33⅓%
	on 3 or more Contarex cameras with lenses, of any focal length.....	} 33⅓% and 5% on net
	on 3 or more separate Contarex lenses, of any focal length, ordered at one time and on one order.....	
	(camera bodies without lenses do not qualify for quantity discount)).	
Group 2:	OTHER 35mm CAMERAS with Eveready Cases:	
	on 1 or 2.....	33⅓%
	on 3 or more, assorted, (but not with Contarex) ordered at one time and on one order.....	} 33⅓% and 5% on net
Group 3:	PRO-TESSARS AND PANTARS FOR CONTAFLEX:	
	on 1 or 2.....	33⅓%
	on 3 or more, any focal length, ordered at one time and on one order.....	} 33⅓% and 5% on net
Group 4:	CONTAX LENSES:	
	on 1 or 2.....	33⅓%
	on 3 or more, any focal length, ordered at one time and on one order.....	} 33⅓% and 5% on net
Group 5:	MONOCULAR 8 x 30 B	
	on 1 or 2.....	33⅓%
	on 3 or more (may be combined with Binoculars), ordered at one time and on one order.....	} 33⅓% and 10% on net
Group 6:	ACCESSORIES:	
	on all listed items.....	33⅓%
	Certain items are offered at 3-piece (3) and 12-piece (12) quantity net prices. Filters of same size can be assorted in colors for maximum discount.	

LIST PRICES:

List prices are shown in the "Price" column.

DEALER'S NET PRICES:

We have coded the dealer's net prices with the following widely used code system:

The numbers in parenthesis (1), (3), and (12), indicate available quantity net prices, where applicable.

(1) = net price for one or two pieces,

(3) = net price for three to eleven pieces,

(12) = net price for 12 or more pieces.

The first two digits of the following code number are dummies, which should be ignored. The remaining part of the code number gives the dealer's net price in dollars and cents and to avoid possible errors, there is always a hyphen between the dollar and cent amounts.

EXAMPLE:

	Dealer's Net	Code Figures	List Price
1 or 2-piece net price:	\$332.67	<u>91</u> 332-67	\$499.00
3-piece net price:	316.04	<u>75</u> 316-04	

Underscored figures in code price are dummies

FEDERAL EXCISE TAX:

All our prices, where applicable, include Manufacturer's Excise Tax in the list and net price quotations. Items carrying Excise Tax are marked with an asterisk. In the case of sales to tax-exempt customers, you can compute the Federal Excise Tax with the following formula:

a) Take 9.09% of the dealer's net price if the F.E. Tax is 10%, or

b) Take 4.76% of the dealer's net price if the F.E. Tax is 5%.

EXAMPLE:

Contarex with Planar f/2 lens, list: \$499.00, net: \$332.67

9.09% of \$332.67 = \$30.24. This is the approximate F.E. Tax.

To facilitate the processing of incoming orders, we ask you to use for each item the catalog number and nomenclature given in this price list.
