

YASHICA

EZ-matic

**EZ-LOAD
SYSTEM**

Take out the film cartridge
Drop it in the camera and shoot

1.

2.

3.

Here's the YASHICA EZ-matic, a fully automatic compact camera. Just drop the KODAPAK cartridge, and you're now ready for shooting. That's all. Film speed is set automatically for the electric-eye. As you compose through the viewfinder, you can check the exposure indicated by the exposure pointer. The amazing-sharp $f/2.7$ lens catches the subject as you see it in the finder. After the last exposure, there's no rewinding. Just wind off the short trailer and drop out the cartridge.

Foolproof Loading, Programed
Electric-Eye and Big, Crisp
Pictures give you the true
enjoyment of picture-taking!

YASHICA *EZ-matic*

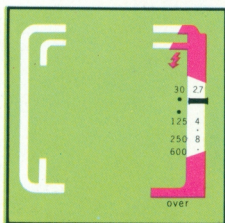

Sharp, Crisp f/2.7 Lens

Your EZ-matic practically sees the picture with its 37 mm, f/2.7 lens. Short focal length assures you of enormous depth of field for precise, crisp pictures.

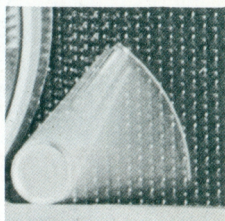

Versatile Viewfinder

Lens-circling electric-eye actuates computer system programed to give you the fastest shutter speed of 1/600 sec. and the smallest opening of f/16. In the brilliant viewfinder you can see the exposure pointer indicating the correct shutter speed and f/stop.

Built-in Self-Timer

Join the fun! You can get in the picture yourself with the handy self-timer, which affords you a full eight second time delay before the shutter snaps.

Features :

- * Yashinon 37 mm, f/2.7 3-group 4-element lens
- * Copal BR programed shutter with speeds of 1/30 to 1/600 sec. plus AUTO & B: Built-in Self-Timer
- * Lens-circling selenium electric-eye coupled to ASA range of 16-500
- * KODAPAK cartridge loading
- * Bright viewfinder with parallax correction frame and exposure pointer which indicates the shutter speed and f/stop
- * X synchro terminal for bulb & electronic flash (shutter speed is set automatically at 1/30 sec.): Manual diaphragm from f/2.7 to f/16
